## Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-12 and 21-27, drawn to a package of collated nails, classified in

Class 206, subclass 338 and others.

Group II: Claims 13-20 and 28-29, drawn to a pallet and a method of making a

pallet, classified in Class 108, subclass 57.17 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct because there is no relationship between

the package of collated nails and the pallet for the purpose of restriction since either the package

of collated nails or the pallet can be used by itself. At most, the claims appear to be directed to

independent features which may be usable together, but the final product such as the package of

collated nails or the pallet are independent and distinct from each other.

Because these inventions are independent and distinct for the reasons given above and

have acquired a separate status in the art because by their different classification and because

they are capable of separate manufacture, use and sale, restriction for examination purposes as

indicated is proper.
